

WordPress Security Automation

Category: Security & Automation | Date: 2023

Coming Soon

This case study is currently under development. Check back soon for the full story about my work developing an automated solution for WordPress malware removal and hardening.

What to Expect

- The creation of a Docker-based utility for automated malware detection and removal
- Implementation of hardening measures to prevent reinfection
- Successful deployment to protect MLPP from persistent cyber attacks
- How infection frequency was reduced from daily/weekly to zero

In the meantime, you can visit the protected site at:

- [MLPP](#)
